

VISY ACCESS GATE – A system which combines logistics, security, and production

Visy Access Gate is a highly versatile access and area control environment designed to automate and manage all traffic of vehicles, personnel, and visitors in industrial facilities and logistics centers. Automated recognition processes and area guidance complement production, ensure well-functioning transactions, and enhance safety and security.

Visy Access Gate covers all access and area control needs with a large selection of recognition technologies and software tools. Visy Access Gate forms a flexible foundation for building access control ecosystems, from local small-scale environments to large nationally centralized systems.
