VISY

VISY TOUCH

Boost your safety performance

Expand your vision

With Visy Touch, contractors can sign in and indicate their working area.

Easy registration for contractors and visitors

Visy Touch is a transaction checkpoint solution which controls the flow of contractors and visitors within factories and other industrial premises. The registration checkpoint is a versatile management tool, whether you are looking for an application to raise your safety level or simply to provide a better customer experience.

Handle safety and security obligations

With Visy Touch, you are always up to date on which area your contractors are currently working in. When signing in, personally identified visitors and contractor personnel are obligated to indicate their working area and to accept and acknowledge safety and security requirements.

Visy Touch can be equipped with various configurations depending on the needs and preferences of operators, as well as the locations of the checkpoints. Regardless of the use case, Visy Touch significantly increases the transparency of operations and improves safety and security within working areas.

- **Transaction checkpoint for visitor access and registration**
- **Visitor instructions, mandatory safety training, etc.**
- **Versatile configuration options**
- **Customized applications and UI appearance**
- **Identification tools: RFID, camera, etc.**
